## **The Hungry Years**

## **Neil Sedaka**

Girl we made it to the top
We went so high we couldn't stop
We climbed the ladder leading us nowhere
Two of us together, building castles in the air

We spun so fast we couldn't tell
The gold ring from the carousel
How could we know the ride would turn out bad
Everything we wanted, was everything we had

I miss the hungry years, the once upon a time The lovely long ago, we didn't have a dime Those days of me and you, we lost along the way

How could I be so blind, not to see the door Closing on the world, I now hunger for Looking through my tears, I miss the hungry years

We shared our daydreams one by one Making plans was so much fun We set our goals and reached the highest star Things that we were after, were much better from afar

Here we stand just me and you
With everything and nothing too
It wasn't worth the price we had to pay
Honey, take me home, let's go back to yesterday

I miss the hungry years, the once upon a time The lovely long ago, we didn't have a dime Those days of me and you, we lost along the way

How could I be so blind, not to see the door Closing on the world, I now hunger for Looking through my tears, I miss the hungry years I miss the hungry years
