# Last Night I Saved an Angel

**Nekromantix**

Another lonely night
My life is passing by
Without it
Your time is up
The moment is near
I miss it

It fills me from afar
It helps me get through another day
I need it
Each night I wish forever
Just one escape to get away
I want it

Last night I saved an angel
I fixed her broken wings
She made me do things I'd never done before
