

Man In The Moon

Nektar

Hey Mister
I can see you up there
Your emotions to me shine on the sea
Stay alive, my friend

Young man
I can see you down there
Wheels keep on turning and your world keeps on burning
It's not right my friend

Mister man in the moon
Tell me, what do you mean

Way before your time
There was just the still of night
No one could see emotions in me
Until now, my friend

Listen, who can I believe
Heartaches always will be
Mister man in the moon
Help me

Time will remember you
I know
Time will make dreams come true
I know, I know

Time will remember you
I know
Time will make dreams come true
I know, I know

Time will remember you
I know, I know
Time will make dreams come true
I know
