

Hospital

Nerf Herder

You wanted to save her from her heavy metal behavior
Saw sadness in her world and so you made her be your girlfriend
When she sang those songs it made you cry

Now she's in the hospital
With a fracture to her skull
One tooth goes under her skin
Another comes out again

She told you all the stories of the girls and the girls and the
boys
Of the drugs and of the parties
Loose morals and Bacardi's
When she said those words you felt twisted inside

Now she's in the hospital
With a fracture to her skull
One tooth goes under her the skin
Another comes out again

They picked her up off the carpet
At the bottom of the stairs to your apartment
They asked you lots of questions 'bout the bruises and the lesions
The police came and took you away

She's in the hospital
With a fracture to her skull
One tooth goes under her skin
Another comes out again
Singin' la la la...
