

It Starts

Nerina Pallot

When all is said and all is done
You shall be the only one
Can I lay my head down, will you say,
"Every little thing's gonna be okay"?

It starts in the head and it begins
It starts and it changes everything
It starts and it never fades away
Can I lay my head down, will you say,
"Every little thing's gonna be okay"?

Did Juliet ever love this way?
The rush of the blood and the swoon and sway
Pretty little love's gonna come for you
Pretty little love's gonna see you through

It starts in the head and it begins
It starts and it changes everything
It starts and it never fades away
Can I lay my head down, will you say,
"Every little thing's gonna be okay"?
Can I lay my head down, will you stay?
Every little thing's gonna be okay.

Finally, I believe that I am happy
All this time, I have waited all this time
To feel it start
To feel it start

Oh, I waited I waited I waited so long
Now the bad things have gone
Oh, I waited I waited so patiently
I knew one day you'd come to me
I knew one day you'd come to me
