

All I Say

Neuroticfish

It's always the same
The consequence is that I'm here
I took the blame this time
I spoke the words that figured out that I am wrong
But I'm not so sure this time

It's always here
The fight of being wrong or right
We wrestle ourselves to the ground
The purpose is not the solution
It's just the game of pain and hurt
And I take the blame that I despair

All that I say is you won't leave me today
All that I say to you - I don't live in silence
All that I say is you won't leave me today
All that I say to you - I'm not using violence
