

Keep Your Head

Never Heard of It

I met her on the side of a dusty road
On the way to Las Vegas she was ready to go
With her dirty blonde hair and little jean skirt
That night I fell so hard for her

Empty hotel dreams
She told me she was all right, okay
She's just another lie
Another passing by that left with my light

Keep your head up and don't say
That's what everybody's doing
You'll find out, you'll find your way
Even if they don't approve it

Met her on a plane on the way to Japan
She was flying all alone, had real big plans
She was a little bit shy, a little bit drunk
She took me there I fell in love

..mile high dreams
She said it was her first time, best time
She's just another lie
Another passing by left with my light

Keep your head up and don't say
That's what everybody's doing
You'll find out, you'll find your way
Even if they don't approve it

Keep your head
That's what everybody's doing
Keep your head
Even if they don't approve it

I never met a girl that
Couldn't keep her head straight
Maybe just this one time
Make me feel right
