Harmony

Never Shout Never

I am I, you are you, we are we We could live in such harmony Can't you see apathy lies between? We could live in such harmony

And I am praying for the day When you and I and he and she are we When you and I and he and she are we Humanity will sing harmony

We start a war but what's it for We fight for peace Peace will find us with harmony

So trade your guns and fire with doves We fight for love And peace will find us with harmony

And I am praying for the day When you and I and he and she are we When you and I and he and she are we Humanity will sing harmony

So one for all and all for one, we for we We could sing in such harmony
I work for you, you work for me, we work for free And we could sing in such harmony

And I am praying for the day When you and I and he and she are we When you and I and he and she are we Humanity will sing harmony
