

## Distance

## Neverending White Lights

Scream out all the ways you notice  
The past is gone, forget what you had  
If you're the only one who knows it  
Then you can't come back to me, I know  
Do whispers of lovers always hold you way  
Underneath the tide in our minds?

Don't you wish you were?  
Don't you wish I was?  
Something more than mystery to uncover  
Don't you wish I was?  
Don't you wish we were?  
Lovers without distance from each other

You say you believe in all this  
But you can't pretend for the sake of faith  
Are we the only ones who mean it?  
For all you give you take from me

Don't you wish you were?  
Don't you wish I was?  
Something more than mystery to uncover  
Don't you wish I was?  
Don't you wish we were?  
Lovers without distance from each other  
And I had wished you were  
And I had wished we were  
Lovers without distance, distance from each other

(If you see them)

Lovers without distance from each other

Do whispers of lovers
