## Distance

## **Neverending White Lights**

Scream out all the ways you notice The past is gone, forget what you had If you're the only one who knows it Then you can't come back to me, I know Do whispers of lovers always hold you way Underneath the tide in our minds?

Don't you wish you were? Don't you wish I was? Something more than mystery to uncover Don't you wish I was? Don't you wish we were? Lovers without distance from each other

You say you believe in all this But you can't pretend for the sake of faith Are we the only ones who mean it? For all you give you take from me

Don't you wish you were? Don't you wish I was? Something more than mystery to uncover Don't you wish I was? Don't you wish we were? Lovers without distance from each other And I had wished you were And I had wished we were Lovers without distance, distance from each other

(If you see them)

Lovers without distance from each other

Do whispers of lovers
