

## Inside Four Walls

Nevermore

Inside four walls I live my life,  
doesn't matter what I've done  
The government's always right  
They tell us what to be, tell us what to believe  
They're wrong, my friend is gone

Inside four walls, inside four walls  
The day they took away my friend

Injustice made its mark  
All the political whores only come out after dark  
If anyone knows the way  
Build me a bridge so I won't fall astray

Inside four walls, inside four walls my friend  
They took away your freedom  
And the pigs still preach their lies

The system falls apart  
The pigs still laugh feeding off our broken lives  
Can anyone tell me why  
Some violent criminals do far less time?

Inside four walls, inside four walls my friend  
They took away your freedom  
And the pigs still preach their lies  
Inside four walls, inside four walls my friend  
They took away your freedom

'It's a cold fact,  
that in the United States of America,  
typically drug offenders do more  
time than child molesters, rapists and murderers...  
is this justice? is this the American way?'

But they'll never take your mind
