

Inside Four Walls

Nevermore

Inside four walls I live my life,
doesn't matter what I've done
The government's always right
They tell us what to be, tell us what to believe
They're wrong, my friend is gone

Inside four walls, inside four walls
The day they took away my friend

Injustice made its mark
All the political whores only come out after dark
If anyone knows the way
Build me a bridge so I won't fall astray

Inside four walls, inside four walls my friend
They took away your freedom
And the pigs still preach their lies

The system falls apart
The pigs still laugh feeding off our broken lives
Can anyone tell me why
Some violent criminals do far less time?

Inside four walls, inside four walls my friend
They took away your freedom
And the pigs still preach their lies
Inside four walls, inside four walls my friend
They took away your freedom

'It's a cold fact,
that in the United States of America,
typically drug offenders do more
time than child molesters, rapists and murderers...
is this justice? is this the American way?'

But they'll never take your mind
