## **Inside Four Walls**

Nevermore

Inside four walls I live my life, doesn't matter what I've done The government's always right They tell us what to be, tell us what to believe They're wrong, my friend is gone

Inside four walls, inside four walls The day they took away my friend

Injustice made its mark All the political whores only come out after dark If anyone knows the way Build me a bridge so I won't fall astray

Inside four walls, inside four walls my friend They took away your freedom And the pigs still preach their lies

The system falls apart The pigs still laugh feeding off our broken lives Can anyone tell me why Some violent criminals do far less time?

Inside four walls, inside four walls my friend They took away your freedom And the pigs still preach their lies Inside fouir walls, inside four walls my friend They took away your freedom

''It's a cold fact, that in the United States of America, typically drug offenders do more time that child molesters, rapists and murderers... is this justice? is this the american way?''

But they'll never take your mind
