

History

Neverstore

We all got our reasons,
We all need to break sometimes
Leave that trouble mind
I know that you worry, don't let it dry you out
Let me take you out

You're building a monster hiding it in your eyes
The tears you're saving are helping that
Creature survive
So sat that you need me
I know we could work it out
Just let me take you out

We go a long way back but that's history
(It's history)
It's been a hell bound track but that's history
(It's history)
These blackened days taking you nowhere it's just
A stage which you'll get over
(You'll get over, you'll get over)
We walk different line

You're pulling them closer, the demons in your mind
Your soul is wide open it's easy for them to get by
Not really an option, let go or fall apart
And to break is a good start

We go a long way back but that's history
(It's history)
It's been a hell bound track but that's history
(It's history)
These blackened days taking you nowhere it's just
A stage which you'll get over
(You'll get over, you'll get over)
We walk different line

We all got our reasons,
We all need to break sometimes

We go a long way back but that's history
(It's history)
It's been a hell bound track but that's history
(It's history)
These blackened days taking you nowhere it's just
A stage which you'll get over
(You'll get over, you'll get over)
We walk different line
