## **Come Back**

**New Buffalo** 

When dark as night I saw the light It shone with more Desire than I'd seen before The leaves begin to fall I smell the air And hear a voice saying Come back Come back I need you now Come back Come back I need you now It's time to lie Down on the shore Where you once cried For more, for more Come back Come back I need you now Come back Come back I need you now It's true It's true I've been avoiding you When all you gave to me Was so pure and so complete The sounds that lull to sleep The flickering of the lights The water so deep Come back Come back I need you now Come back Come back I need you now It's time to lie Down on the shore Where you once cried For more, for more Come back Come back I need you now Come back Come back I need you now
