I've got plans to take you down Privately we'll make a time Taking notes and making charts One machine to map the heart

Silver lining in your mind Look inside but never find Hanging pictures on the wall While you're thinking how you left all

While you're away
With stars in your eyes
The infection is so close to the heart
Give me some time
It's all that I need
You lie beside your dreams in the dark

Please pick up the phone
I picture you asleep
And you're alone
You're listening to the sound
Of your inside
It's never been so sweet or so alive

While you're away
With stars in your eyes
The infection is so close to the heart
Give me some time
It's all that I need
You lie beside your dreams in the dark

Give me some time
It's all that I need
Give me some time
It's all I need

Give me some time
It's all that I need
Give me some time
It's all that I need
Give me some time
It's all that I need
Give me some time
It's all that I need
It's all that I need
