

# All Downhill from Here

New Found Glory

Your hiding something cause  
Its burning through your eyes  
I try to get it out  
But all I hear from you are lies

And I can tell you're going through the motions  
Figured you were acting out your part  
Once again we're playing off emotion  
Which one of us will burn untill the end

Catalyst you insist to pull me down  
You contradict the fact that you  
Still want me around  
And its all downhill from here  
And its all downhill from here

Your good intentions  
Slowly turn to bitterness  
Reoccurring episodes  
With each and every kiss

And I can tell you're going through the motions  
Figured you were acting out your part  
Once again we're playing off emotion  
Which one of us will burn untill the end

Catalyst you insist to pull me down  
You contradict the fact that you  
Still want me around  
And its all downhill from here  
And its all downhill from here

And I cant believe you pulled it off again  
Or notice till it all sets in  
You'll deny it till  
You're at your bitter end

And I can tell you're going through the motions  
Figured you were acting out your part  
Once again we're playing off emotion  
Which one of us will burn untill the end

Catalyst you insist to pull me down  
You contradict the fact that you  
Still want me around  
And its all downhill from here  
And its all downhill from here  
(then you keep pulling me down)

Pulling me down (pulling me down)  
You contradict the fact that you  
Still want me around  
And its all downhill from here  
And its all downhill from here
