

## Prayer Flags

New Model Army

I met a Moko man from the other side  
The room began to capsize as he was telling me his tales  
And all my beliefs and best belongings  
were flying useless through the air  
And when they all were lost - then we were brothers

By the wheel the tellers stands shaking numbers from his hands  
His face is masked and his coats tails are waring  
He cries 'Round and round and round she goes  
Where she lands nobody knows, but hey thank you for asking'

The prayer flags are flying in the wind

In the last days of winter, just a few of us remained  
We built a fire of remembrance on the frozen land  
And as the sparks flew up into the night to dance around the stars  
Beneath our very feet the ground was shifting

The prayer flags are flying in the wind  
The prayer wheels spinning in the wind

And there she blows 'S our time is gone  
And in the womb a new head is beginng to turn  
Beyond these Carnival lights there is nothing at all  
Just the distant screams and the endless fall

A single drop of rain falls on my windscreen  
We're closer to the very edge than we realise  
The bridges all have been washed away or bombed out  
And the water runs fast and black and cold

The prayer flags are flying in the wind  
The prayer wheels spinning in the wind
