We all feel the same All pleasure nothing to gain I've known you from the start I've grown used to your wooden heart Now you know my name You search your empty brain in vain If you don't change your ways You'll end up here with me unraised (???) Without you they'll never know Without you my life won't flow Without you they'll never show Without you the night won't go Without you I'm left alone Without you I'm on my own Without you I lay in pain Without you I've gone insane

Now you must decide
What good's a lie when you've nothing to hide
Maps they'll never show
They're dumb like you, they never know
It's time we said goodbye
Bury your head and silence your cry
Know the feel of pain
Join our world and play our game

Without you they'll never know Without you my life won't grow Without you they'll never show Without you I'm left alone Without you I'm on my own Without you I'm on my own Without you I wrap my face Without you I'm left alone Without you I'm left alone Without you I'm on my own Without you I'm on my own Without you I lay here in pain Without you I've gone insane

Whatever you may think of me Don't ever take my dignity (4x) Whatever you may do to me Don't crucify my dignity
