## **New Generation**

**New Politics** 

I met a stranger he had fire in his eyes Then I met a pretty angel but she was like too dead inside Then I met a bunch of children with no food to eat and no place to hide So I tried to get away now but there's nothing in the world that can keep me in the skies

So if you ever happen to bump into to god Please ask him if he made us all up for fun Come on

Don't keep me waiting you've got nothing to lose The world is fading you've got nothing to prove Finally it all comes crashing down to the earth Finally we get what we deserve

I met a preacher he had heart but he was blind Then I met another homeless who sold his soul for less than a dime So I opened up the papers but there were rats and painted lies So I looked up to the sky and smiled and realized how small we are

So if you ever happen to bump into to god Please ask him if he made us all up for fun Come on

Don't keep me waiting you've got nothing to lose The world is fading you've got nothing to prove Finally it all comes crashing down to the earth Finally we get what we deserve

Pardon my french This is so ridiculous I'm a product of God Still there's poison in my blood I find it cynical I think you're critical We better breakout Before we blackout

Raise your voice Don't let them break you down All depends on what you do It's a state of mind Free the youth Don't let them break you down All depends on what you do It's a state of mind

This boxing ring ain't big enough For the two of us So hold your ground (Don't look down) One wrong move and you'll Taste the ground Taste the ground

Oh oh We Are the new generation Oh oh We have to rebuid the nation

Oh oh We Are the new generation Oh oh We have to rebuid the nation

Finally finally Finally finally We get what we deserve
