

Epidemic

New Years Day

We are the new disease
eating hearts like cancer
The sickness in our mind
believes everything
Plauged by fiction
like a sick addiction
There's a virus deep inside us
and it kills

Can you taste it in the blood?
When you breathe it in your lungs
If you feel it coming on
It's too late

We are infected
and no one is protected
We're so, we're so contagious
We're apathetic
and no one's sympathetic
We're so contagious

You can't contain it
You know you can't escape it
We're so, we're so contagious
Our hearts betrayed us
and no one's gonna save us
We're so contagious

(We're all infected)

When will someone admit it
We're a generations of cynics
Where everyone's a critic
and no one really gives a shit
When our hate goes viral
If ignorance is bliss
How do we live like this?
There's nothing we can do
to try and take control
When it spreads to your soul!

Can you taste it in the blood?
When you breathe it in your lungs
If you feel it coming on
It's too late

We are infected
and no one is protected
We're so, we're so contagious
We're apathetic
and no one's sympathetic
We're so contagious

You can't contain it
You know you can't escape it
We're so, we're so contagious
Our hearts betrayed us

and no one's gonna save us
We're so contagious

There's no cure for what's in us
So pessimistic quick to judge
Now there's poison on our tongues
This epidemic's gonna kill us all!

(We're all infected)

We are infected
and no one is protected
We're so, we're so contagious
We're apathetic
and no one's sympathetic
We're so contagious

You can't contain it
You know you can't escape it
We're so, we're so contagious
Our hearts betrayed us
and no one's gonna save us
We're so contagious

It's gonna kill us all
It's so contagious
