

# Let It All Come Out

Newsboys

Who, who's touched you, child? now you can't feel a thing, not anything  
Who's been the one telling you lies? now you'll believe anything

Oh, you gotta let, let it all come out  
Let, let it all come out  
Right now  
Right now

How, how many fires, to make you feel pure again, alive again?  
And what will it take, what has to break, for you to begin again?  
What will it take?

Oh, you gotta let, let it all come out  
Let, let it all come out  
Right now  
Right now

Lift yourself out of it all  
Come out from the shadows to the sun  
Oh, you gotta lift yourself out of it all  
Yesterday's over, a new day's begun  
You're only sick of all your secrets  
Let them all come out, let them come  
This devil came to steal your name away  
This devil came to give your name away

Oh let, let it all come out  
Let, let it all come out  
Let, let it all come out  
Right now  
Right now
