

# Love Liberty Disco

Newsboys

And if I told you there's somebody who loves you  
Would you say, "hey, show me that face"  
And if I told you that true freedom was actual  
Would you say, "hey, take me to that place?"  
And if I said, "there is a family  
A body that moves as one"  
Do you feel the LOVE that invites us  
LIBERTY excites us  
The DISCO has just begun, has just begun

Give me love, give me liberty, disco  
The place everybody in the family's found  
On that day we will all be happy people  
When love, liberty, disco's in town

And as we step into the light of the lover  
We're all the same, there's no rich or poor  
And you know it's never been good for a man to be alone  
So come on in, your name's on the door  
What are we waiting for

All our fears are turning 'round  
Fall down, and meet your maker  
Where our true selves will be found  
Calling out to every lonely soul
