

The Same God

NewSong

Back to the wall, scared you'll fall
What you going to do
Day and night,
Don't know why its like the worlds' against you
You're praying for a break through

There was a day
When your faith couldn't be held down
God was near enough to hear every word
But somehow you wish He heard you right now
Don't you know

The same God who was with you then is with you now
The same God who led you in will lead you out
So take all the fear and doubt
Go on and lay them down
The same God, the same God is with you now

Can't you see
Everything happens for a reason
There's a time, there's a place
For every season
He knows what's best for you
So don't be afraid

The same God who was with you then is with you now
The same God who led you in will lead you out
So take all the fear and doubt
Go on and lay them down
The same God, the same God is with you now

Just keep holding on
Oh keep holding on

The same God who was with you then is with you now
The same God who led you in will lead you out
So take all the fear and doubt
Go on and lay them down
The same God, the same God is with you now
