

# Brick by Brick

Newton Faulkner

I'm hoping it'll all get better  
But it keeps on getting worse  
Time and time again  
People running as the earth shakes  
Just another earthquake coming in  
To break my faith in this

Wind blowing off the rooftops  
Water in the basements  
Looking like lightning strikes again  
Story ends and another begins  
And they will keep on coming  
They will keep on coming

Every single flame burns bright and fades  
But that's okay

My best-laid plans are washed away  
No time to make 'em all again  
Sometimes life gets in the way  
We've got to keep on breathing

Look how far we've come  
Look what we've made  
Started from nothing, building

(2x):  
Brick by, brick by  
Brick by, brick by  
Brick by, brick by  
Brick

So we're back to broken hearted  
Back to where we started  
Everything we built gone down again  
If this was in the movies  
It's said to be the truth  
Bet no one would believe a word of it

Far reaching on the hillsides  
Losing by a landslide  
Everybody's patience wearing thin  
The drama ends and another begins  
But if everybody loses, everybody wins

Every single flame burns bright and fades  
But that's okay

My best-laid plans are washed away  
No time to make 'em all again  
Sometimes life gets in the way  
We've got to keep on breathing

Look how far we've come  
Look what we've made  
Started from nothing, building

(2x):

Brick by, brick by  
Brick by, brick by  
Brick by, brick by  
Brick

All we have is us  
To build back up  
What we have lost  
But that's enough

Every single flame burns bright and fades  
But that's okay

My best-laid plans are washed away  
No time to make 'em all again  
Sometimes life gets in the way  
We've got to keep on breathing

Look how far we've come  
Look what we've made  
Started from nothing, building

(2x):

My best-laid plans are washed away  
No time to make 'em all again  
Sometimes life gets in the way  
We've got to keep on breathing
