

## From The Bars

Newton Faulkner

Feels like it was meant to be  
We were young, we were wild, we were free  
And we would drink and plot and scheme  
But privately we all assumed they were just childish dreams

But we fought through all the pain  
We don't regret the sacrifices we have made  
And I near drove myself insane  
Hoping that I'd make it through to better days

But look at us now, we got the gold  
This is our song and we're gonna sing it where we roll  
And no-one thought we'd get this far  
This is our song and they're gonna sing it from the bars

And when I found it hard to breathe  
I was broken and I was down, on my knees  
It seems it was meant to be  
And I guess now it's plain for everyone to see

So look at us now, we got the gold  
This is our song and we're gonna sing it where we roll  
And no-one thought we'd get this far  
This is our song and they're gonna sing it from the bars

And everytime we lost our way  
And now we're back and here to stay  
I fought so hard and did not rest  
And now we've passed the final test  
We made it through against all odds  
Though we were the underdogs  
Showed them all that we could be  
Now we'll go down in history  
You get me love, you get knocked back  
But every time get back on track  
We fought so hard to reach this day  
But now it's here so

Just look at us now, we got the gold  
This is our song and we're gonna sing it where we roll  
And no-one thought we'd get this far  
This is our song and they're gonna sing it from the bars  
We've come so far, so far  
This is our song and they're gonna sing it from the bars  
And no-one thought we'd get this far  
This is our song and they're gonna sing it from the bars
