

Let's Get Together

Newton Faulkner

On and on the rain will fall
But I won't feel a thing
You just stroll on by
Our eyes are yet to meet

And there is just one thing that I wish I said
And it's always running around my head
And if I was to see you one more time
I'd have to say it I don't know why

Let's get together
(Why don't we get together)
Let's get together
(Why don't we get together)

On and on the sun will shine
The light breaks through the leaves
We'll stroll hand in hand
But our eyes are yet to meet

I can make you tea and some toast and rub your feet
And we could snuggle on the couch and watch TV
And if we're cold I could chop some wood for the fire
And I could give you piggy backs if you get tired

Let's get together
(Why don't we get together)
Let's get together
(Why don't we get together)
Let's get together (why don't we get together)
Let's get together (why don't we get together)

Why don't we get together
Why don't we get together
Why don't we get together
Why don't we get together

Let's get together (why don't we get together)
Let's get together (why don't we get together)
Let's get together (why don't we get together)
Let's get together (why don't we get together)
