Yo, let me start off by first apologizing Girl, you think I take you for granted But um
I'm here to take it back

Can we pull back a minute and make believe that? I don't know you and you don't know me Darling, let's pretend
This old school love is brand new

Can we explore the places I've already been? Just tell me where and I'll kiss it again Darling, let's pretend This old school love is brand new

I know I shouldn't have to ask But it seems that I've relaxed And I'm getting the feelings that It's time I take it back

[Incomprehensible] night escapes
In the car callin' out my name
You being scared when your friend was late
Then being cool when it finally came, those were the days

Can we pull back a minute and make believe that? I don't know you and you don't know me Darling, let's pretend
This old school love is brand new

Can we explore the places I've already been? Just tell me where and I'll kiss it again Darling, let's pretend This old school love is brand new

Way back when hickies were the thing You wore bloomers, not that sexy G-string And gettin' blue balls was a daily thing But it was alright, with me

To when that very first time went down
How you moaned when I went down
You were the one, I had no doubt
We need to get that back right now 'cause those were the days

Can we pull back a minute and make believe that? I don't know you and you don't know me Darling, let's pretend
This old school love is brand new

Can we explore the places I've already been?

Just tell me where and I'll kiss it again

Darling, let's pretend

This old school love is brand new

We're still here
'Cause we conquered every feeling

The fire burns inside like yester year My baby since back in the day

We knew it would be us Holding on to that first crush Had to say today, is what it was So let's keep on sending, it's only beginning

Can we pull back a minute and make believe that? I don't know you and you don't know me Darling, let's pretend
This old school love is brand new

Can we explore the places I've already been? Just tell me where and I'll kiss it again Darling, let's pretend This old school love is brand new

Can we pull back a minute and make believe that? I don't know you and you don't know me Darling, let's pretend
This old school love is brand new

Can we explore the places I've already been?

Just tell me where and I'll kiss it again

Darling, let's pretend

This old school love is brand new

Back, like Cadillacs and hubcaps
Back, like leavin' letters in your nap sack
Back, like Jellies and pro keds
Back to girl, when we first met

Back, to when Mike had the glove on Back, to when our love was so strong Back, to the days I know you miss I'll give back, I promise this

Can we pull back a minute and make believe that? I don't know you and you don't know me Darling, let's pretend
This old school love is brand new

Can we explore the places I've already been? Just tell me where and I'll kiss it again Darling, let's pretend This old school love is brand new

Let me explore the places I've already been?

Tell me where and I'll kiss it again

Darling, let's pretend again, let's pretend

Baby, I wanna just love you, I wanna love you

I wanna love you, [Incomprehensible] you, [Incomprehensible] you

That's all I wanna do, baby

All I wanna do, love
