You and Me

I got a young heart And it's wild and free And I don't know where it starts But it ends with you and me It's a hard road As far as I can see And I don't where I'm going But I'll get back to you and me

Cause we're two kids Trying to start a fight No matter where we go Yeah, we'll be alright All I'm asking for Little patience, please Cause I know what's to come And it's coming for you and me

Time has never been on our side So won't you wait for me? I lead a selfish life Cause that's what I need What do I have to do To make you believe? That it's all for you and me

From a distance I can hear you cry Don't you worry darlin' Don't you say it's a cry Cause I can promise it Yeah I can guarantee At the end of the road I can see you and me

Time has never been on our side So won't you wait for me? I lead a selfish life Cause that's what I need What do I have to do To make you believe? That it's all for you and me

Cause when I look down the line At the man I wanna be Yeah it was known from the start That it ends with you and me
