

All In My Head

Niceland

So once again
I'll shed my skin
I guess it's the time of year
You said „Enjoy the beginnings“
I guess the end is near

The hardest part is always there
Waiting to show it's face
We co-exist on fair trades
Mine's the night, you got the days

Stop!
Where do we go?

It should be all in right balance
That's how we planned it all
That's why I lose on my defence
The stars just never work

I should have thought of a back up plan
I should have fought for this
And if I am to get what I deserve
I'll take this one for the team

Stop!
Where do we go?

'Cos it's all in my head
I've never realised

I have anything to love
I have anything to hate
No, you'll never be alone
We're in this together

I have anything to love
I have anything to hate
No, I'll never be alone
'cos it's all in my head
