

Make It Last

Niceland

Tonight is not your night, you're
not the one to kiss and tell
It's not you who's getting lucky after all
I kept the curtains down and low profile
but I gotta always undermine
what a stupid dick you are
I am not even being hard on you

Make it last forever
Make this last

Is your life getting so boring with your
little book of friends
What's your secret and
do I even want to know?
You left me with our fiftieth truce
Don't temp me to play by your rules
I won't care no more if there are
people getting cursed and hurt

Make it last forever
Make this last
