

Song You Won't Forget

Niceland

There's a song for every situation
funeral of a friend
the letters never sent
There's a cause for every inspiration
The road that never ends
your heartbeat on defense

The sounds of you dying
is the sound of now or never

This is all that we could get
this is what we've always had
This is the song you won't forget
This is the knife going in
this what we've always been
This is the song you won't forget

They've been chasing cars and never gotten hurt
Nights were passing by
they got left high and dry
all their hopes would slowly rise, then crash and burn
And they've never left that town
and let their lives throw'em around
the sounds of you dying
is the soundtrack of all the time
sounds of you dying
is the sound of now or never

This why we're out of charts
this is where we always part
This is the song you won't forget...
