

# I Will Believe

Nichole Nordeman

We were meant to open doors  
And we were meant to face the danger  
Never knowing what's in store  
And never having met a stranger

One of us is big and brave  
And one of us is tenderhearted  
One of us is tempting fate  
And the last but not least of us  
Has faith enough for each of us

And I know  
That I could never go it alone  
'Cause I believe  
I'd be lost without You here beside me

It's like daylight  
At midnight  
It's my favorite dream when nothings really as it seems  
Don't wake me  
Just take me  
Take me by the hand and I will believe

We have always been protected  
Little ones should run and hide  
But we expect the unexpected  
When love arrives and calls us all inside

And I know  
That even when the wind blows  
I'll be fine  
'Cause You and I will get by 'til Springtime

It's like daylight  
At midnight  
It's my favorite dream when nothings really as it seems  
Don't wake me  
Just take me  
Take me by the hand and I will believe

Don't close your eyes, I'm right beside you  
Don't be afraid, I'm never far  
You and I were always meant to  
Wake the dreamers from the dark  
Come out, come out wherever you are

It's like daylight  
At midnight  
It's my favorite dream when nothings really as it seems  
Don't wake me  
Just take me  
Take me by the hand and I will believe

Come out, come out wherever you are
