Love is Blind

Nick Fradiani

I've never lived a simple life I just got one confession With you I start to question Every single thing I thought was right I may never learn my lesson But you are my only heaven

You and me Is everything I need Everything I want But I want to believe That when they say love is blind That I see Everytime you smile When they say only fools rush in That I may be foolish to know what forever is

I know love can be a scary thing But you are more than worth it Girl I ain't even nervous Your touch it makes the fire burn And now that this fires rolling I keep on wantin' more of

You and me Cause its everything I need Its everything I want And I want to believe That when they say love is blind That I see Everytime you smile When they say only fools rush in That I may be foolish to know what forever is

I've never lived a simple life But you are my only heaven You are my only

So when they said love is blind That I see Everytime you smile When they say only fools rush in Then I may be foolish To know what forever is
