

# Starlight Starbright

Nicolette Larson

Baby i am here  
Baby i am here

Never thought that in a million years  
Never thought that you would come to me  
You're the answers to a million prayers.  
You're the apple of my eye.

I can hear you breathing next to me.  
Just how lucky can one person be?  
I am looking at a mystery  
Everything i dream, more than i can wish for.

Starlight starbright, all day all night  
I will be right next to you.  
Here forever, i will never leave, i will never leave.

Baby you're my little ray of light

I could find you in the darkest nights  
If you cry then i will hold you tight  
Never letting go, i would do that for you.

Starlight starbright, all day all night  
I will be right next to you.  
Here forever, i will never leave, i will never leave.

Baby i am here  
Baby i am here

Starlight starbright, all day all night  
I will be right next to you.  
Here forever, i will never leave, i will never leave.
