

# There Is Life

Night Ranger

Everything happens for a reason  
Sometimes it's hard and we ask why  
But it's never all for nothing  
If we have hope then we gotta try

You and me we are forever  
It takes a lot to keep love alive  
I can't do it all alone  
I need you by my side, oh

There is life, this I know  
As long as there's love there is life  
There is life, this I know  
As long as there's love  
As long as there's love there is life

Tell me all your secrets  
Everything you wanna be  
We can find our way to somewhere  
Where we can be free, girl

Is the world too hard to live in  
For sometimes it can be  
But if we find ourselves together  
It was all meant to be

There is life, this I know  
As long as there's love there is life  
There is life, this I know  
As long as there's love  
As long as there's love there is life, yeah

We don't always know, will the searching ever end  
Whatcha wanna know, there is life, there is love  
Ever after, ever and ever again

There is life  
There is life, this I know  
As long as there's love there is life  
There is life, this I know  
As long as there's love  
There is, there is life

There is life, this I know  
As long as there's love, as long as there's love there's life  
There is life, this I know  
As long as there's love  
As long as there's love there is life  
As long as there's love there is  
As long as there's love there is life
