Touch Of Madness

Night Ranger

She wakes in the morning Got a smile on her face She's not sentimental About her night's embrace Another lucky day Lucky night on the town Man she got the touch I say she wears the crown She say "I get high when I want to Don't ya think you need it too"

I need a touch, I need a touch of madness She changes by night It's a crime in the street She dazzles the boys As she moves though the heat Set out all alone On a hot summer night Man she got the touch She makes you sweat all night She say "I get wild when I want to Madness is the thing to do"

I need a touch, I need a touch of madness I wake in the morning With a smile on my face Never sentimental About my night's embrace Another lucky day Lucky night on the town Now I got the touch Now I make the rounds I say "I get off when I want to Don't you want to feel it too"

I need a touch, I need a touch of madness
