

# Astra Planeta - We Chose The Sun

Nightfall

Times where eyes come to rest  
Elliptic shaped lights profile  
Andromeda's solar breasts  
So gigantic, monstrous, fire

Blast  
The kiss of stars, explode  
Galaxies unite  
Inner hyper force to form

Dark surrounds the space  
Lights suffer  
Frequencies thrive  
Grand buster  
Dark clouds dominate my wrath  
Approaching end of cycle  
From coma come to life

We are about to fall  
But we chose the sun  
Sterling sun

We are about to fall  
Believe it  
We are about to fall  
Can you feel it?  
We are about to fall  
Can't you see it?  
But we chose the sun  
Sterling sun

Play with your silent parts  
A shadow ready to transform  
Don't let your self in scripts of pessimism  
Don't let it drown

Fate  
Shows her ugly face  
Stare at the sun now  
An orison asks your grace

We are about...

We are about to fall  
But we chose the sun  
Sterling sun

We are about to fall  
Believe it  
We are about to fall  
Can you feel it?  
We are about to fall  
Can't you see it?  
But we chose the sun  
Sterling sun

We are about to fall

But we chose the sun  
Sterling sun

We are about to fall  
Believe it  
We are about to fall  
Can you feel it?  
We are about to fall  
Can't you see it?  
But we chose the sun  
Sterling sun
