

Date With Destiny

Nightmares on Wax

You have a date with destiny
She's late
Fate goes on ahead
Can't wait
Lady love runs out like an astranged wife
But it's alright
Time's on your side

Left with your dreams
You're only means of escape
Seems you're only friend is time as you wait
Hate can't wait to take positive hostage
But it's alright
Time's on your side

So...
Don't let it bring you down, it's wrong
There's always a way around, so hold on
Open up your mind and let light in

Don't let it bring you down, it's just fate
There's always a way around, if you wait
Open up your mind and let light in

Now you see positivity, and its confidence
Mr Optimistic, and his best friend confidence
In a new light
It's alright
Time's on your side

And with time comes
Open and join him, Mr negativity
Hating his boys and ...
As hope starts to say
It's alright
Time's on your side

When we get to the party
Party packs no doubt
Enjoyment's at the door
Kick ya disappointment out
There's fun on the floor
Good vibes on the mic
Spite tries to fight with hate and dislike
But Will gets his way, 'cos Will's got the power
Time has the last say, 'cos time has the hour
It's alright
Time's on your side
