

Stick Around

Nik Kershaw

Drink the good stuff down in one
Call for another, have yourself some fun
Here's to the good life, drink it down
Stick around
The morning after, playing dead
Don't see the black clouds gather overhead
Consequences raining down

Stick around
You might just learn something
God only knows what that could be
Stick around
You might just learn something
God only knows and he won't say

The wolf is in your dressing gown
He's huffing, puffing,
blowing your house down
The party's over, the love is gone
Think what to do you better run,
yeah you better run or

Stick around
You might just learn something
God only knows what that could be
Stick around
You might just learn something
God only knows so don't ask me
Stick around

What doesn't hurt me kills me slow
What doesn't scare me is nothing I don't know
What doesn't kill me makes me strong
When everything goes bad,
when everything goes wrong

Stick around
You might just learn something
God only knows what that could be
Stick around
You might just learn something
God only knows and he won't say
