

Lovetrap

Nikola Šarčević

I know you met someone last night
See it in your eyes
You said "We only talked, alright"
Now that's a big lie

And I know it's all over now
I guess we lost our love somehow
The moment you left through that door
No, you never come back here no more

You came and took your things today
Give me your ring back
I never thought it'd end this way
Fell in your love trap

And I know it's all over now
I guess we lost our love somehow
The moment you left through that door
No, you never come back here no more

You said you'd never come in back home
You got me chockin'
Now that's a typical syndrome
When a heart gets broken

And I know it's all over now
I guess we lost our love somehow
The moment you left through that door
No, you never come back here no more

it's all over now
we lost our love somehow
you left through that door
And I know you never come back here no more!
it's all over now!!!
