

# Hadron Collider

NIM VIND

A hadron collider is made  
I live fast when I feel it  
And I know there's no other way  
In dark matter I see it

You start it thumping  
And I can't make it stop

The beat is calling me back  
To my heart attack  
I feel it coming back to life  
Dead on arrival for my come back special

A hadron collider engaged  
I got my finger on a rock and roll trigger  
I don't look to a better day  
I'm barely hanging on living in this one

You start it thumping  
And I can't make it stop

The beat is calling me back  
To my heart attack  
I feel it coming back to life  
Dead on arrival for my come back special

You shattered all of this  
With one amazing will to witness  
I only wonder if the world  
Can handle all of this debris

The beat is calling me back  
To my heart attack  
The beat is calling me back  
To my heart attack

The beat is calling me back  
To my heart attack  
I feel it coming back to life  
Dead on arrival for my come back special
