## **Faded Memories**

Neva wanted to say good-bye Time passes, people change (you changed) At this moment, I can't cry Sadness like my body left me feeling insane I was crazy for you Needed you like the blood in my veins Would have done anything for you Guess your feelings weren't the same Stuck in the past, thought it would last Now I'm sitting here all alone Stuck in the past, thought it would last My fairy tale's all gone Stuck in the past, thought it would last Trying to carry on..

Faded memories, linger beside me
everywhere I go, I see you, feel you, hear you..
Baby I need you
Faded memories, linger beside me
everywhere I go, I see you, feel you, hear you..
Baby I need you
Baby I need you

Like flowers need the sun or a drummer needs a drum My soul feels incomplete when you left all of me I'm dangerously in love with you all I long to hear was you love me too The years, the cries, the tears, your lies Yet still I try, I try, I try To make this love survive But I am followed by these memories

Baby I need you, Baby I need you
