

# Satellite

Nine Inch Nails

Data trails, like fingernails  
Scratch across, the sky  
Hard to know, figure out  
Tell the truth, from lies  
Everywhere, listening  
Every word, you say  
Think I found, a way around  
Yeah, I think I found, a way

Well, come on (come on [repeats])

Satellite, I'm watching you  
I'm one step, ahead  
Satellite, I'm part of you  
I'm inside, your head

Yes we can, yes we did  
Eliminate, this dread  
Better watch, what you think  
What was that, you said?  
Everywhere, and everything  
And every word, you say  
Think I found, a way around  
Think I found, a way

Come on

Satellite, I'm watching you  
I'm one step, ahead  
Satellite, I'm part of you  
I'm inside, your head  
Satellite, I'm watching you  
I'm one step, ahead  
Satellite, I'm part of you  
I'm inside, your head

Satellite  
Satellite, I know you're up there somewhere  
Satellite, I know you're up there somewhere  
Satellite, (so very high)  
I know you're up there somewhere  
Satellite, (so very high)  
I know you're up there somewhere  
Satellite, (so very high)  
I know you're up there somewhere  
Satellite, (so very high)  
I know you're up there somewhere  
Satellite, (so very high)  
I know you're up there somewhere  
Satellite, (so very high)  
I know you're up there somewhere  
So very high  
So very high
