

Light It Up

Nine Lashes

I must confess, the weight of this is overwhelming
With things unsaid they were walking the other way
They have defined this heart of mine by darker shadings
When they can't see me at all

We'll make it fall
We'll make it fall

So light it up, light it up, burn it to the ground
Or dig it up, dig it up, never knowing
The night has come, night has come for the overrun
And right here, we're gonna burn it down

They can't begin to comprehend what's lying under
They break the skin as they're walking the other way
Let's take the wall, we'll make it fall and crumble
We're gonna burn it down
I know what separates us all

So light it up, light it up, burn it to the ground
Or dig it up, dig it up, never knowing
The night has come, night has come for the overrun
And right here, we're gonna burn it down

So light it up, light it up, burn it to the ground
Or dig it up, dig it up, never knowing
The night has come, night has come for the overrun
And right here, we're gonna burn it down

We'll make it fall
We'll make it fall

We'll take their wall to the ground and burn

We'll make it fall
We'll make it fall

We'll burn it down

We'll make it fall
We'll make it fall

Burn it down

So light it up, light it up, burn it to the ground
Or dig it up, dig it up, never knowing
The night has come, night has come for the overrun
And right here, we're gonna burn it down

So light it up, light it up, burn it to the ground
Or dig it up, dig it up, never knowing
The night has come, night has come for the overrun
And right here, we're gonna burn it down
