

## Don't Forget Us

Nipsey Hussle

I'm just sitting round here smoking weed with my niggas  
I just hope when we gone that they don't forget us  
Look  
We just sitting here tryna win, pull up to the spot it's a flock of Benz  
So much smoke need oxygen, re-up money that's not to spend  
All gold bottles at Toxic and standing on the couch me and my accomplices  
Pop a bottle, spot the bitch, get the bitch, got the bitch  
Streets wanna know when you droppin Nip?  
Police wanna know how you got your Six?  
Niggas on the side hate to watch the shit  
See you on top so they throw rocks and shit  
Never really was with the talking shit  
Me, I just went and got a pot to piss  
Upgrade diamonds on my watch and shit  
Pictures on the wall at the offices  
AC colder than my Compton bitch talking that "You don't even need a condom" shit  
Look, I'm really on some baller shit on some rich nigga I ain't gotta call you shit  
On some fuck with me if you loyal shit, everybody in my circle get spoiled shit  
Really started in the soil shit, crowns on the wrist that's royal shit

Look  
We just sitting here tryna win, drop 20 bands you can fly us in  
Turned down deals they gone try again, we need a partnership it ain't no signing him  
You don't see the type of cars we in, you don't see the shows and the lines for them?  
You don't know the spots we residing in, nigga we straight with dough ain't no enticing him  
Look at my life my friend, I got the right to win  
I put the grinding in, even on them nights when the lights was dim  
When my hope was low, I found light within  
I know it's ups and downs so every loss I took I knew to strike again  
And I be saying a lot, that's a priceless gem  
And if we living in hell is it alright to sin?  
I had a goal to chase, a life to live  
I tried to wash my hands, pulled me right back in
