## Girls

They go for you With their love and fear They go being And never disappear If you rub yourself for long enough You get down to their kind of emotion Straight to your heart Sweet doll Straight to your heart

Gotta love and forgive Or you can't breathe Gotta search and be with Or you can't breathe I got something to give Before I leave I can never run back

I'm smothered in Memories, and you are too What is given back We can't unglue All this sticks to me Some days sweet like honey Some days tart like marmite Sticks to your heart Sweet doll Straight to your heart

Gotta love and forgive Or you can't breathe Gotta search and be with Or you can't breathe I got something to give Before I leave I can never run back

The croft, the croft Old lofts and searching The path, the path Of always searching All from the heart All from the need All from the love All from the greed The croft, the croft Old lofts and searching Right from the, right from the heart Old from the need Old from the love Old from the greed

I tell you this old heart is covered in glue I can never run back or forget you

I tell you this old heart is covered in glue I could never run back or forget you

## Nizlopi

Gotta love and forgive Or you can't breathe Gotta search and be with Or you can't breathe I got something to give Before I leave I can never run back
