

# Don't Even Think

Nneka

You will never see me crawl  
You will never see me beg  
For the pride that you have  
For the fact that you are you

For the joy you brought to me  
For the pain you made me feel  
Words have meanings  
But actions speak louder, see

Don't even think about it  
Don't even think about it  
Don't even think about it  
Don't even think about it

Don't even think about it  
Don't even think about it  
Don't even think about it  
I still will stand for you, make me strong

For is this what we have made?  
For the sunshine and the rain  
For the talents that you claim  
You still are human so just relax

For the hearts that you have broken  
For the blood that you have been sucking  
For the riches you have been claiming  
I would stop you from your greed

'Cause you got to know that you would go too far  
For you shall never prosper with someone's loss  
For broad, broad is the way that you are on  
You're running in the wrong direction, see

Don't even think about it  
Don't even think about it  
Don't even think about it  
Don't even think about it

Don't even think about it  
You make me full  
Don't even think about it  
You make me weak

Don't even think about it  
You make me  
I still will stand for you  
Make me strong  
You make me strong

For the love that did deceive  
For the hate that you conceived  
For the fact that you did what you did  
I still would stand

In solitude, I am closest to life, to love

What drives me is loneliness  
My heart is hardened, senses are numb  
Can't feel nothing, can't hear no one  
Is almost like I'm invisible  
But I would stand for I'm strong

Still stand naked, not one day and don't realize  
I'm not complete without the Lord  
I'm learning and I'm growing in my pain  
But I reach out to the most high  
For He is my keeper, God is my keeper  
Love is my keeper

You make me full  
Don't even think about it  
You make me weak  
Don't even think about it

You make me full  
Don't even think about it  
You make me strong  
Don't even think about it

You make me strong  
Don't even think about it  
You make me full  
Don't even think about it

You make me weak  
Don't even think about it  
You make me, I still will stand  
Love is my keeper
