

Never ever, ever gonna be the same  
Never gonna be the same  
It's nothing new you've gone missing before  
People like you fade in and out  
Somehow we got lost in the travels  
Why did the world unravel us  
And how it was?  
Sometimes I feel like I just passed you by  
And left you standing in your pain  
But you were the one with the magic  
You were the one with the sparkle  
And you had it all  
I know it's never gonna be the way it was  
How can it?  
Feelings change and people can get lost  
But I still think of you so much  
Do you remember how it was?  
Never ever, ever gonna be the same  
Never gonna be the same  
So what you doing while the day goes by?  
And what you thinking in your head?  
I just want you to be happy  
Please let me know if you are, the way you were  
I know it's never gonna be the way it was  
How can it?  
Feelings change and people can get lost  
But I still think of you so much  
Do you remember how it was?  
I know its never gonna be the way it was  
How can it?  
Feelings change and people can get lost  
But I still think of you so much  
Do you remember how it was?  
Never gonna be the way it was  
How can it?  
Feelings change and people can get lost  
But I still care about you so much  
Do you remember how it was?  
I still care about you so much
