You say

It's time to make a stand and make a clean sweep of this world You say

It's time to understand if you don't shout you won't be heard

Never got a minute

Just to take it easy

Always so busy in you're ideology

Looking in your filofax

If there is some time you can spend with me

Standing on the corner
Waiting for you lonely
Hoping you'll come alone
You were at a meeting
Or a demonstration
Trying to save the earth

I should have known Should have known

You say

You've got a few demands and those responsible will pay You say

It's time to for reprimands and no one's gonna get away
